PRODUCT LEAFLET

Indivisible stand max. 65 inch

062.2700 Indivisible wheeled stand for flat screens up to 50 inch, double construction

The SmartMetals indivisible stand is particularly suitable for permanent installation. The stand allows positioning of the display over the full length of the column. Furthermore this stand has three separate cable ducts, the screen can be protected from theft by means of a padlock and it can be installed without using any tools. A screen mount with three point coupling bolts should be added, which can be chosen by looking at the weight and mounting pattern of the screen.

PRODUCT LEAFLET

Indivisible stand max. 65 inch
